Statement

12th April 2023

GDPR Statement

The Trust has technical solutions in place to provide employees with secure access to the Trust's data outside of school/office (Multi-Factor Authentication is enabled). This negates the need for employees to download data onto portable devices and removable media, such as USBs, and employees are forbidden from storing personal data on such media, and should ensure that if it is necessary to download personal data it is solely stored on encrypted devices and encrypted portable media.
